PROFILE

I have been a Full stack engineer since 2016, and a Front end engineer since 2018 driven by a strong passion for continuous learning and innovation. I am proficient in several JavaScript and PHP frameworks, with extensive experience in developing web applications. My expertise includes creating efficient, scalable, and maintainable code that meets the highest quality and performance standards.

EMPLOYMENT HISTORY

Frontend Engineer, eFishery   Bandung, Indonesia
Nov 2021 — Present

- Define and develop guidelines to ensure code quality.
- Collaborated with teams to deliver advancements and solutions.
- Worked to build and improve upon tools, such as a platform to collect pond data with satellite imagery and also build a tool with AI.
- Improve high quality HTML/CSS/JS code, ensuring codes that i developed are cross-browser and cross-platforms compatible
- Ensuring web products I develop adhere to our company-wide style guide and match the designed user experience.

Frontend Engineer, Bareksa   Jakarta, Indonesia
Oct 2018 — Nov 2021

- Define and develop guidelines to ensure code quality.
- Collaborated with teams to deliver advancements and solutions.
- Worked to build and improve upon tools (some investment platforms)
- Improve high quality HTML/CSS/JS code, ensuring codes that i developed are cross-browser and cross-platforms compatible
- Ensuring web products I develop adhere to our company-wide style guide and match the designed user experience.

Fullstack Engineer, PT Andaglos Global Teknologi   Bandar Lampung, Indonesia
Apr 2016 — Sep 2018

- Built and maintained web application for the accounting platform, hospital platform, etc
- Participated in software design discussions.
- Problem solved with various stakeholders.
- Effectively managed individual priorities and deadlines.
- Improved software and delivered products under tight time constraints.

PROJECT EXPERIENCES

Bareksa Web

I rebuilt the web platform for our company with React Js as the main technology in the front-end.

Bareksa is the first integrated online mutual fund marketplace in Indonesia.

You can see in https://www.bareksa.com

Bareksa For Business

Mutual fund platform for institutional customers. I build the whole front-end, with React as the main technology.

You can see it in http://bisnis.bareksa.com or for see screenshot of the platform, you can see in here https://ibb.co/album/QkpmSx.

KolamKu

A platform for collecting pond data, managing pond data, and managing cultivation.

This platform is also able to collect pond data using satellite imagery.

Shrimp Procurement GPT

An innovative solution dedicated to assisting shrimp procurement teams in meeting future supply needs.
With our advanced features, checking information regarding shrimp stocks in the field can be done easily and efficiently, ensuring a smoother and more responsive procurement process.
